After solidifying a world-wide cult following and releasing countless 12" singles over the past 7 years, **Uncle Howie Records** finally released **Non Phixion's** highly anticipated debut LP, "The Future Is Now". Along with the assistance of legendary producers DJ Premier, Pete Rock and Large Professor, "The Future Is Now" features guest appearances from Beatnuts, MF Doom and the nefarious Necro. In Addition, rockers Christian Olde Wolbers & Raymond Herrera from Fear Factory and Deftones guitarist Steph Carpenter get down as well. In the short 9 months since it's release, the album has sound-scanned close to 30,000 units in the US and sold over 60,000 units worldwide. [www.nonphixion.com](http://www.nonphixion.com)
